

## PK40X Customized Pressure Transmitter

### Tips

- If you are unable to match a product that meets your needs in PK200, PK208, PK400, PK402, PK404, or PK408. PK40X is a product that meets your needs.

PK40X is a series that can provide personalized customization according to the actual needs of customers.

### Customized Services

- You can provide the required indicators and parameters according to your actual needs, and our engineers will provide personalized customization services for you. The general customization range is: wider temperature range, special precision, special range, special appearance size, special signal output, material, special characteristics, etc. Your personalized customization needs include but are not limited to the above requirements.

Please contact our sales engineer for specific requirements.
